

SASANK SURYA THOTA

shashanksurya24@gmail.com — +91 6300330998 — Hyderabad, India — LinkedIn — GitHub

PROFESSIONAL SUMMARY

Data Scientist with hands-on experience in machine learning, predictive analytics, SQL-driven workflows, and business intelligence reporting. Skilled in Python, SQL, Power BI, statistical analysis, dashboard development, and transforming complex datasets into actionable business insights.

EXPERIENCE

Data Science & Generative AI Intern

Sep 2025

Innomatics Research Labs, India

- Built ML pipelines for preprocessing, feature engineering, model training, and predictive analytics workflows.
- Developed Python and SQL-based automation solutions for data processing, reporting, and API-driven analytics.
- Applied data validation, cleansing, transformation, and analytical problem-solving to improve data quality.

EDUCATION

SRM Institute of Science and Technology, Chennai

2025

B.Tech in Computer Science and Business Systems

CGPA: 8.9/10

CERTIFICATIONS

Commonwealth Bank – Introduction to Software Engineering Job Simulation

British Airways – Data Science Job Simulation

TECHNICAL SKILLS

Programming: Python, SQL, JavaScript

Data Science: Machine Learning, Predictive Modeling, Statistical Analysis, Feature Engineering

Analytics: Data Mining, KPI Analysis, Business Insights, Reporting, Dashboard Development

Visualization: Power BI, Excel, PowerPoint

Data Engineering: Data Cleaning, Validation, Transformation, SQL Query Optimization

Backend: Flask, REST APIs, API Integration

Libraries: Pandas, NumPy, Scikit-learn

Tools: Git, GitHub, Jupyter Notebook, Streamlit

PROJECTS

Customer Churn Prediction System

- Developed an ML application using Python, SQL, Scikit-learn, and Streamlit for churn prediction.
- Performed preprocessing, feature engineering, model optimization, and predictive analytics.
- Built a real-time dashboard delivering business insights for customer retention decisions.

Brazilian E-Commerce Analytics Dashboard

- Analyzed large e-commerce datasets using Python, SQL, Pandas, and Power BI.
- Built KPI dashboards, revenue trend reports, and customer behavior analytics visualizations.
- Applied data validation, transformation, and reporting workflows for business intelligence insights.

Secure IoT Authentication System

- Built a blockchain-based authentication system using Python, Flask, SQLite, and SHA-256.
- Simulated Sybil, Replay, and DoS attacks for anomaly detection and threat analysis.
- Created analytical monitoring dashboards for event tracking and security behavior insights.
